

CHAINLUBE PROFESSIONAL

CHAIN LUBRICANT
FULLY SYNTHETIC

Description

Fully synthetic chain lubricant with deep penetration. Chain drives often operate out in the open and are therefore exposed to dirt and water. MOTOREX CHAINLUBE PROFESSIONAL repels dirt and water, providing effective protection against their effects. It adheres very strongly to the substrate and can therefore provide lasting lubrication. The lubricant's high-quality additives give it a low coefficient of friction, which increases the lifespan of mechanical parts.

Field of application

MOTOREX CHAINLUBE PROFESSIONAL can be used to lubricate all common chain systems. It has been specially developed for industrial and agricultural applications and is particularly suited to the loads experienced by industrial chains (carrier chains, leaf chains, roller chains, accumulation chains, apron conveyor chains, etc.).

Advantages

- fully synthetic
- water- and dirt-repellent
- extra-strong adhesion
- excellent penetration
- compatible with all common chain types

Use

Shake can before use. Spray onto clean chain and leave to act. For optimum results, clean the chain first with MOTOREX POWER CLEAN.

Container size
500 ml
