

# COPPER SPRAY

## TEMPERATURE STABLE

### Description

Copper Spray is a multipurpose, special lubricant on copper base. It is perfectly suited to prevent mechanical parts facing high temperatures, such as exhaust manifold screws, spark plugs, brake pads, heat exchangers, of getting stuck due to heat. Spray selectively on parts before assembly, Silencing properties, oxidation stable, prevents corrosion and extremely temperature stable from a perfect adhesion. Drip proof and salt water resistant. Application range: -40 °C to +1200 °C (-40 °F/+2192 °F)

### Advantages

- temperature-resistant
- perfect adhesion
- protects from corrosion
- water resistant

### Use

Please clean parts with spray BRAKE CLEAN. Shake well before use. Reverse can after use and continue spraying until only gas emerges.

### Contents

300 ml
