

COPPER SPRAY

Copper spray

Description

A special lubricant for preventing the fusing/sticking of parts subject to high thermal stress such as exhaust screws, ignition plugs, brake pads and heat exchangers. Noise-absorbing, oxidation-stable, protects against corrosion, very adhesive, salt-water-resistant and extremely temperature-stable. Application range: -40 °C to +1200 °C.

Field of application

MOTOREX COPPER SPRAY is perfect for preventing the fusing/sticking of parts subject to high thermal stress such as exhaust screws, ignition plugs, brake pads and heat exchangers.

Application

Clean parts in advance with MOTOREX POWER BRAKE CLEAN.

Advantages

- temperature-stable
- adhesive
- very good corrosion protection
- water-resistant

Notes

Shake the can well before use until the mixing ball is moving freely.

Sizes

300ml

SAP-Nr.	Product name	packaging unit
