

SILICONE SPRAY

SILICONE OIL

Description

Lubricating, conditioning and protecting agent for plastics, rubber and all metallic parts. Plastic components are given a high gloss and rubber parts are conditioned and do not freeze-up. Thermally stable form - 50°C to +200°C. Antistatic, water-repellent, impregnating and prevents oxidation. Dielectric.

Advantages

- antistatic
- water-repellant
- stable at different temperatures

Use

Shake before use.

Contents

500 ml
